DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto et al. (5,607,416).

With regard to claim 1, Yamamoto discloses an undergarment, as shown in figure 1, comprising an absorbent part 1 and a belt 2. The belt 2 comprises two separate belt portions, one extending longitudinally from the back portion of the undergarment and comprising fastener means 13a, and the second extending longitudinally from the front portion of the undergarment and comprising fastener means 13b. Both belt portions directly connected to the absorbent part 1 and are separated from each other by a third belt portion extending longitudinally from the absorbent part 1 in either direction away from the first and second belt portions. Fastener means 13a and 13b attach the ends of the separate belt portions around the waist of the wearer. The belt 2 comprises two narrow sheets 2a and 2b, with elastic members 12 attached to the sheets, running parallel to each other in the longitudinal direction of the belt 2. The sheets may be a fabric with the elastic members 12 woven into the fabric, as disclosed

Art Unit: 3761

in column 4, lines 31-33. The fabric parts of the belt 2 are inherently of different stiffness than the elastic parts.

With regard to claim 2, the two parts of different stiffness, the fabric sheet 2a and the elastic members 12, are mutually adjacent, as shown in figure 1.

With regard to claim 3, the longitudinally extending elastic members 12 are located in the central part of belt 2, with the fabric sheet 2a at the longitudinally extending edges, as shown in figure 1.

Allowable Subject Matter

Claims 4-9 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
